## **DETAILED ACTION**

### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Edward Timmer on 8/25/04.

Claim 5, line 5, add -and  $\Delta P_i$  is a normalized measure of pressure deviation- after "function".

### ***Allowable Subject Matter***

Claims 1-11 are allowed.

The instant application is deemed to be directed to a non-obvious improvement over the invention patented in Pat. No. 6,532,799. The improvement comprises the steps of flowing a gas through a mold of cavity containing the fiber preform, measuring gas pressure at multiple locations on the mold wall while applying the gas through the mold cavity, and analyzing the gas pressure using discriminant analysis to detect defects of local preform of the fiber prior to injecting liquid/resin molding process while Zhang et al. in Pat. No. 6,532,799 teaches a method for in-situ and on-line monitoring a fiber preform process using a plurality of pressure sensors located within the mold sections to measure gas pressure at multiple locations on the mold to obtain a permeability profile of the preform to detect defects of the local preform by comparing it

with a simulated pressure profile acquired prior with the knowledge of the permeability of the fiber performs.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
